CORPORATE GUIDE

ARCHIVE

We love when our clients say things like - authentic, organic, detailed, engaging. It's such a turn-on, because at Archive, we believe your social events should look more like "you" and less like a corporate party. And if we're being honest, we also think your corporate parties should look more like "you" and less like a corpo-rate party. If you agree then you've come to the right place, and this little book that you hold in your hands is evidence that we are not alone in our thinking. In these pages you will see a few mo-ments where we banded together with forward-thinking event planners and did things a little differently. Sure, we've worked with name-drop-worthy corporations, but we have just as much love for the DIY entertainer. In the end, we just want smart, interesting and really good looking events to be enjoyed by smart, interesting and really good looking people, like you. These events take a little extra attention to detail, but the good vibes are totally worth it. So when you're ready, let's grab a latte, throw a bunch of crazy ideas around, and design something fun together!
